EDUCATION

San Diego State University, San Diego, CA — **December 2019**

Bachelor of Science in Astronomy
Minor in Mathematics

TECHNICAL SKILLS

- Skilled: Python, MySQL, Linux, TensorFlow, QA
- Experienced: Big Data, PySpark, Tableau, JavaScript
- Tools: GitHub/Git, VS Code, Bash,
- Cloud Technology: Azure Databricks, Azure Machine Learning, Azure Cognitive Functions

DATA ANALYTIC PROJECTS

HR Data Analysis | Code

- Sample of Analysis of HR data | **Data Preprocessing**, **Data Exploration**, Training the Model, Feature Selection

Financial Data Analysis | Code | Website

- Automatically Creation of Interactive Plots of Company Financials | Data Preprocessing, **Financial Data**, **Data Visualization**

RELEVANT EXPERIENCE

Production Support Engineer, CircleBlack Inc — **November 2021 – Now**

- Create automations to support **troubleshooting** client issues with high level data analysis
- Debug Application software including log parsing across multiple components on multiple servers
- Work with and provide support to developers to **implement solutions** as needed, release code, and creatively solve problems

Software Engineer, Digital Communications Solutions — **March 2021 – September 2021**

- Tested new software releases by developing and implementing test plans, test cases and test processes on 5 software releases using **JIRA**
- Preprocessed, validated, and visualized data by creating a **dashboard** using **Python** to assist Engineers in making data-driven decisions
- Created and maintained accurate documentation for the release of an upcoming IoT sensor product

Lab Technician, Digital Communications Solutions — **November 2020 – March 2021**

- Analyzed incoming IoT data and exported visuals/reports to **Microsoft Word**
- Oversaw internal database responsibilities and accept modification requests from staff in a timely manner
- Install and **configure computer operating systems**, applications, and client software for the Operations department
- Ran diagnostic **SQL queries** for quality assurance to ensure proper firmware and software on pr

CHAMP Advisor / Researcher, University of Pennsylvania, Philadelphia PA — **Summer 2019 / Summer 2020**

- Effectively communicated research results to **non-technical audience** of over 500 people by using figures, analogies, and appropriate language to tell a story
- Assisted team members in setting up workspace environments
- Accessed computational clusters via **SSH** to run computational workloads
